

Formidable Forms (Lite)

Course Intro

Hello! I'm Victor Font and welcome to Formidable Masterminds.

Formidable Forms is the most powerful WordPress form builder plugin on the planet! You made a great decision in selecting it as your form builder tool of choice.

With minimal investment and training, you'll never meet a form building challenge that can't be accomplished with Formidable Forms. You'll be able to build anything from a basic contact form to the most complex web-based enterprise application and, in so doing, turn your dreams into solution-based realities.

This free course is for beginners. It assumes little to no experience with WordPress and teaches you all you need to know to get the most out of the Formidable Forms free version, available from the WordPress plugin repository.

In this course, you will learn:

- Three ways to install the plugin
- Learn about Global Settings, Add-ons, and Styles
- Learn how to create your first form:
 - from scratch
 - or from a template
- Learn how to display the form on a page or post using:
 - The WordPress Classic Editor
 - Or Gutenberg
- Learn how to change your form's settings:
 - The General settings
 - The Actions & Notifications
 - Styles and buttons
 - Even customize the form's HTML
- Learn how to View or Edit Form entries
- Or Import and Export Forms, and Export Entries

This course consists of 5 Lessons covering 16 topics, all presented in 22 easy steps. To get started, let's go ahead and move onto Module 1—Installation.
